FOR IMMEDIATE RELEASE

Safeguard Continues Global Expansion with New Partnerships in the UK and Finland

Post Falls, Idaho – December 10, 2024 – Safeguard Equipment, a leader in advanced personal safety technology, is proud to announce strategic partnerships with Horizon and Eurolaite to distribute its flagship product, the Compass Pro Emergency Response System (ERS), in the United Kingdom and Finland respectively. These collaborations mark a significant milestone in Safeguard's mission to provide enhanced safety solutions to field workers globally.

The Compass Pro ERS is a state-of-the-art device designed to improve safety and efficiency for professionals working in high-risk environments. With features such as real-time electrical hazard detection, fall alerts, SOS capabilities, and live monitoring, it is an indispensable tool for industries including utilities, telecommunications, construction, and more.

"Partnering with Horizon in the UK and Eurolaite in Finland positions Safeguard to make a substantial impact on worker safety in these regions," said Tim Ledford, CEO of Safeguard Equipment. "Both Horizon and Eurolaite share our commitment to delivering innovative safety solutions, and their extensive market expertise makes them ideal partners for this initiative."

Horizon's Role in the UK Horizon, a premier distributor of cutting-edge technology and safety equipment, will serve as the exclusive distributor of Compass Pro ERS in the United Kingdom. With decades of experience and a reputation for excellence, Horizon is well-equipped to bring

Safeguard's solutions to a broad spectrum of industries. **"We are thrilled to collaborate with Safeguard Equipment to introduce the Compass Pro ERS to our UK clients,"** said [Horizon Representative's Name], [Horizon Representative's Title]. "This partnership aligns perfectly with our mission to provide innovative tools that protect and empower workers in hazardous environments."

Eurolaite's Role in Finland Eurolaite, a trusted supplier of advanced electricity quality control and protection solutions, will bring the Compass Pro ERS to Finland's safety-conscious market. Known for their dedication to high-quality products and long-term partnerships, Eurolaite will be instrumental in ensuring the successful adoption of Safeguard's technologies. **"The Compass Pro ERS represents a significant advancement in worker safety, and we are excited to partner with Safeguard Equipment to offer this solution to our customers in Finland,"** said [Eurolaite Representative's Name], [Eurolaite Representative's Title]. "This collaboration reinforces our commitment to delivering high-quality and competitive solutions to the electrical and power distribution sectors."
