# Introduction

The Safeguard Navigator Console complements and enhances the Safeguard Navigator Mobile iOS and Android Apps. Navigator Console features several types of user accounts to provide different levels of access to data, insights, and controls.

For Base and Dispatch users, Navigator Console provides a portal to access and view your personal account data, adjust account settings, visualize, respond to, and interact with emergency events generated by your organizational group in real time.

For Administrative users, Navigator Console provides additional organizational control, user management, subscription seat management, device configurations, and data insights.

## Primary Functions

- Account settings
  - Access personal data records
- Real-time emergency events
  - Interactive map view
  - Emergency event audible and visual notifications
  - Emergency event chat
- Organizational management
  - Organizational group structure
  - Subscription seat allocation
  - User management
  - Remote User's Device configuration control
  - Event logs

# Specifications

## Navigator Console

<b>Supported Browsers</b>	Safari, Chrome, Opera, Firefox, Edge
<b>Supported Languages</b>	English, Danish, Finnish, French, German, Greek, Norwegian, Portuguese, Spanish, Swedish

## Privacy

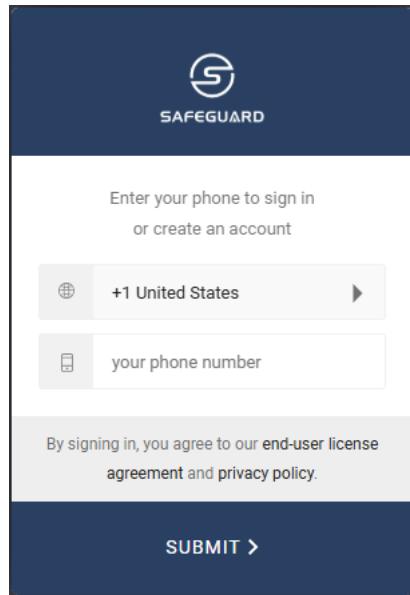

For privacy information regarding the Navigator Mobile & Navigator Console applications, please see our Privacy Policy. <https://www.safeguardequipment.com/privacy-policy-apps/>

# Getting Started

## Log In

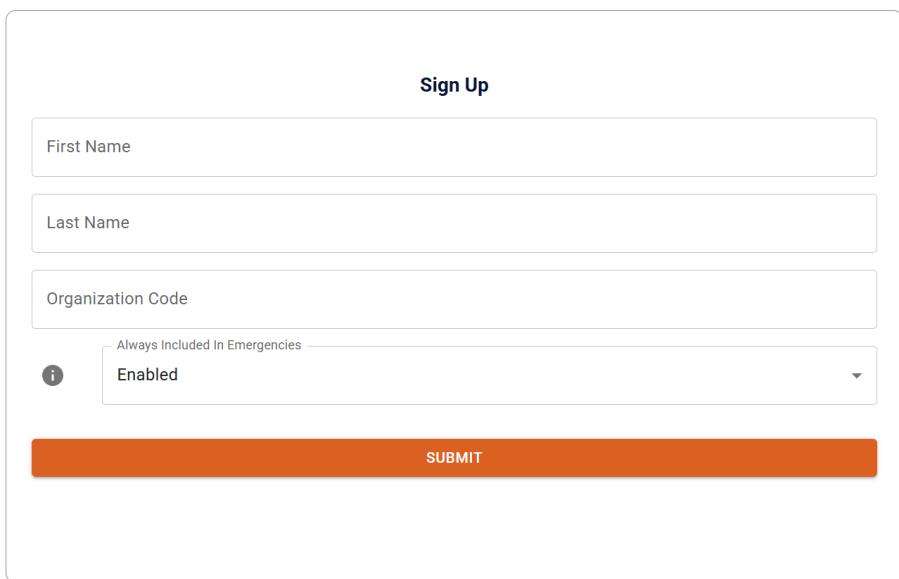

Navigate to <https://www.safeguardwebapp.com/>

Follow the on-screen prompts to sign in. Accounts used for Navigation Mobile are the same accounts used for Navigator Console. When prompted, use the Organization Code provided by Safeguard Equipment Inc. This code uniquely identifies your organization and the members that are in it. If an organizational pin has been set by your administrator, you will also be required to input the pin during sign up.

The Sign In Authentication Page features a dark blue header with the Safeguard logo. Below it, a light blue section contains the text 'Enter your phone to sign in or create an account'. It includes a dropdown for 'Country' set to '+1 United States' and a text input field for 'your phone number'. At the bottom, a note states 'By signing in, you agree to our [end-user license agreement](#) and [privacy policy](#)'. A large blue 'SUBMIT >' button is at the bottom.

Sign In Authentication Page

The Sign Up Page has a light blue header with the text 'Sign Up'. The main area contains four input fields: 'First Name', 'Last Name', 'Organization Code', and a dropdown menu for 'Always Included In Emergencies' set to 'Enabled'. At the bottom is a large orange 'SUBMIT' button.

Sign Up Page

## Available Features

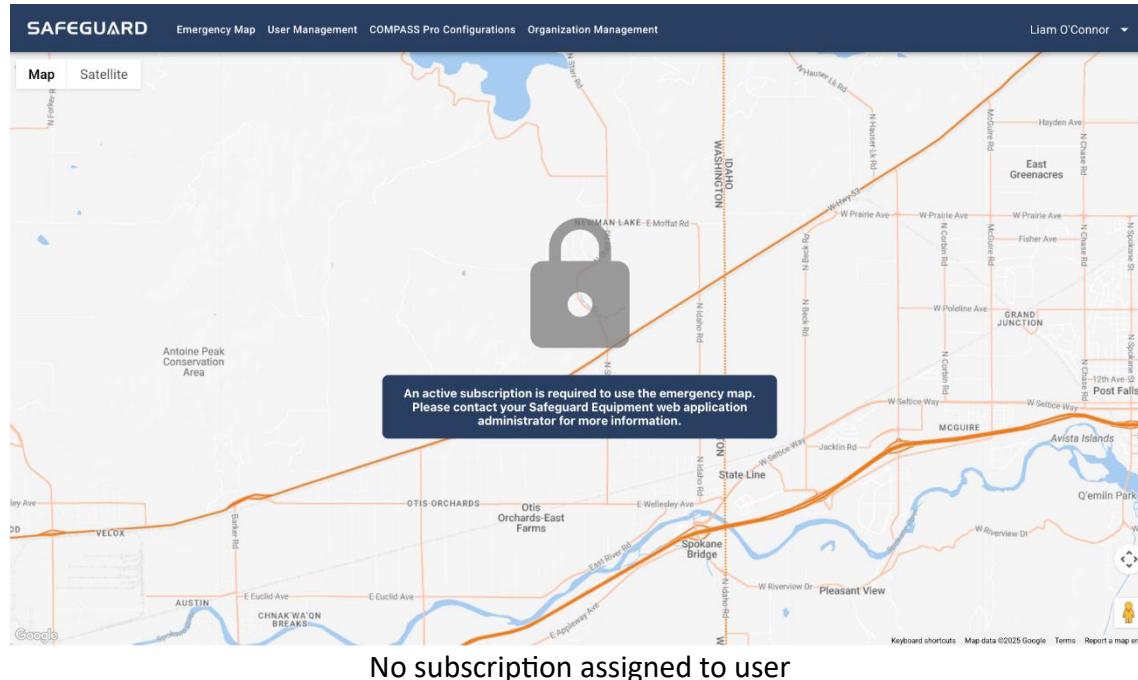

Most Navigator Console features are only available with a service subscription.

The matrix below describes the features you receive with and without a service subscription for different user types.

Description	No Subscription (Base)	Subscription (Base/Dispatch)	Subscription (Admin)
Access to account data	✓	✓	✓
Access to delete account	✓	✓	✓
Emergency map + chat features	✗	✓	✓
User management features	✗	✗	✓
Organization management features	✗	✗	✓
Compass Pro device configuration features	✗	✗	✓

Safeguard Equipment Inc. will assign an administrator level user for your organization as directed (there can be more than one if desired). Once an administrator level user is established, this person has full control over the structure of the organization, user roles, configurations, and management of the organization.

A user with no active subscription will be displayed the following page until a subscription is assigned to them by an administrator:

# Using Navigator Console

## User Profile

On your user profile page, you can update your personal details and preferences, such as your name and language. You can also view information about your organization and group. Additionally, you have the option to download a PDF copy of your user data or delete your account along with all associated data.

### “Always Included In Emergencies” checkbox:

- Dispatch Users: When checked the user is included in all emergency events within their organization. Dispatch users have this box checked by default.
- Admin Users: When checked the user is included in all emergency events within their organization.
- Mobile Users: When checked the user is included in all emergency events within their group.

The screenshot shows the Navigator Console User Profile Page. At the top, there is a navigation bar with links for Emergency Map, User Management, COMPASS Pro Configurations, and Organization Management. On the right, a user profile dropdown menu is open, showing 'Liam O'Connor' and a list of options: Profile (highlighted with a green box), Emergency History, Help, and Log Out. A large green arrow points from the 'Always Included In Emergencies' checkbox in the 'Personal Details' section to the corresponding checkbox in the 'Profile' dropdown menu. The 'Personal Details' section also contains a 'Phone Number' field with '+12105550103' and a checked 'Always Included In Emergencies' checkbox. Below these are 'DELETE ACCOUNT' and 'DOWNLOAD MY DATA' buttons. The 'Organization Details' section shows 'Organization' as 'EcoVolt Utilities', 'Organization Code' as 'ECOVOLTO', and 'Group Name' as 'Default'. It has 'CHANGE ORGANIZATION' and 'CHANGE GROUP' buttons. The 'Settings & Preferences' section shows 'Language' as 'English (US)' and 'Web App Version' as '4.0.0'. The 'Documentation' section links to 'PRIVACY POLICY' and 'BROWSER PERMISSIONS'.

User Profile Page

## Emergency Map

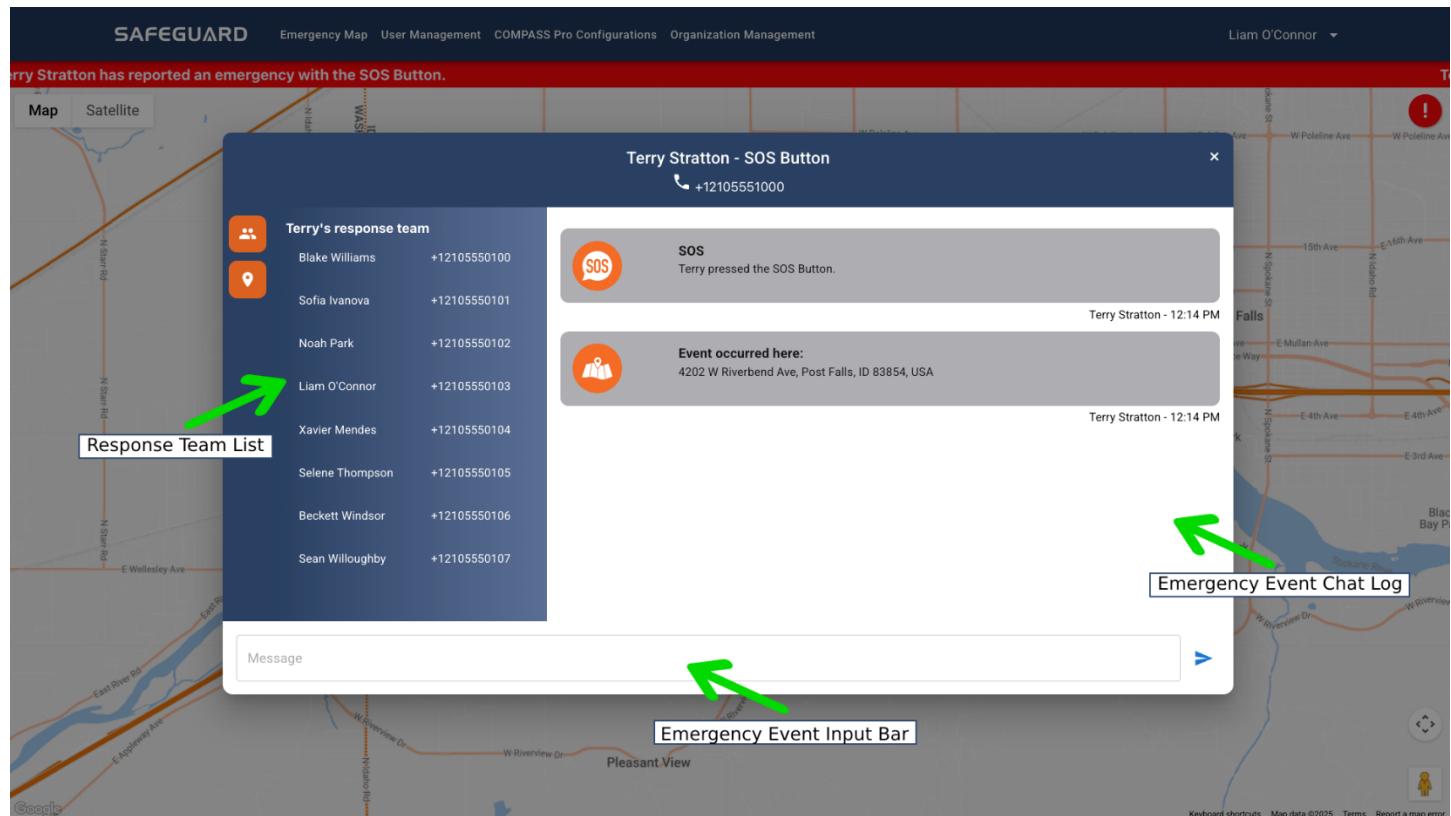

When an emergency event occurs, Navigator Console users are directed to the emergency map and shown the location of the event via a RED marker. They will also hear an audible alarm. Clicking on the Emergency Event Marker opens the corresponding emergency chat. The historical Emergency Event Log can be viewed by clicking the “!” symbol.

The screenshot shows the Navigator Console interface with the 'SAFEGUARD' logo at the top left. The top navigation bar includes 'Emergency Map', 'User Management', 'COMPASS Pro Configurations', 'Organization Management', and a dropdown for 'Steve Daily'. On the left, there is a 'Search Users' input field and a dropdown menu showing 'Default', 'Gas Pilot', and 'Spokane' with checkboxes. The main area is a map with a red marker at the coordinates 47.7711, -117.1552. The marker is labeled 'Emergency Event Marker' with an arrow. Above the marker is an 'Emergency Event Banner' with the text 'Tucker Shannon has reported an emergency with the SOS Button.' To the right of the marker is a 'Response Team Marker' with the letters 'AF'. A red button labeled 'Emergency Event Log' with an exclamation mark is located to the right of the map. Other map controls include 'HIDE WORKER LOCATIONS', 'VIEW ACTIVE EMERGENCIES', a zoom control, and a user icon. The map shows streets like 'Centennial Trail' and 'W Riverbend Ave'. At the bottom right, there are links for 'Keyboard shortcuts', 'Map data ©2025', 'Terms', and 'Report a map error'.

Map View

## Emergency Chat Dialog

With the emergency chat open, Navigator Console users can see the designated response team members and the corresponding event details, enabling a fast and coordinated response. Once an emergency event is created, only the person who created the emergency event can mark it as resolved. Emergency events automatically close after 24 hours if they are not resolved by the creator.

Emergency Chat Dialog

## User Dashboard

The user dashboard provides a centralized view of individual user details, device status, emergency service settings, and app permissions. This dashboard is designed to help users and administrators monitor and manage user activity.

- **Emergency Service Settings:** Indicates which safety features are enabled (Arc Flash Detection, SOS Button Sound, Fall Detection, Head Impact Detection) with green checkmarks for active services.
- **User Data:** Includes role, group membership, and subscription status.
- **Mobile Device Details:** Lists the user's phone model, battery level, app permissions (location and notifications), app version, and operating system.

Navigator Console User Guide – Jan 23, 2026

Page 9 of 18

## Connection Lost Feature

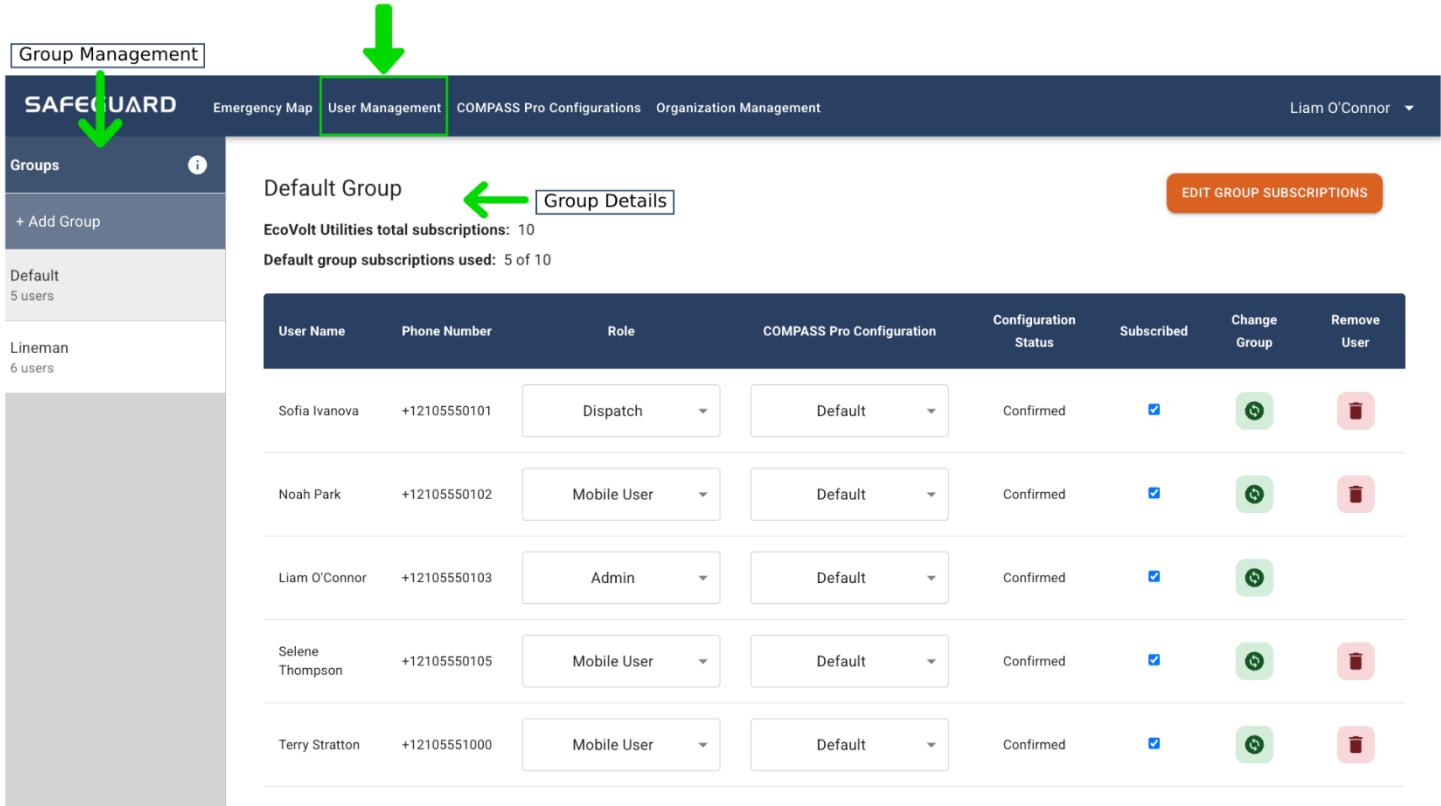

The connection lost feature enhances real-time monitoring of worker safety and device status. When a user is actively wearing their Compass series device, the system continuously tracks connection status. If a device loses connection for more than three minutes, the dashboard will display a visual indicator and a dedicated map marker.

- **Visual Indicator:** A new user icon appears on the map, showing that a worker has lost connection. This icon includes details about when and where the user was last seen.
- **Active Monitoring:** The feature only operates when the user is actively wearing the Compass device, ensuring accurate and timely alerts.
- **Location & Time:** The dashboard provides the last known location and timestamp for the disconnected user, allowing dispatch and administrative users to respond quickly

## User Management

The user management page enables administrators to create and organize users into custom groups, manage roles, and assign device configurations to their organization's users. Administrators can also monitor whether users have accepted the latest Compass Pro configuration through the confirmed/unconfirmed status column, as well as allocate subscription seats, and remove users from the organization as needed.

User Name	Phone Number	Role	COMPASS Pro Configuration	Configuration Status	Subscribed	Change Group	Remove User
Sofia Ivanova	+12105550101	Dispatch	Default	Confirmed	<input checked="" type="checkbox"/>		
Noah Park	+12105550102	Mobile User	Default	Confirmed	<input checked="" type="checkbox"/>		
Liam O'Connor	+12105550103	Admin	Default	Confirmed	<input checked="" type="checkbox"/>		
Selene Thompson	+12105550105	Mobile User	Default	Confirmed	<input checked="" type="checkbox"/>		
Terry Stratton	+12105551000	Mobile User	Default	Confirmed	<input checked="" type="checkbox"/>		

User Management Page

### Groups

Create custom groups to divide and manage users. Users only receive emergency alerts for the group they are in. To delegate subscription seats to each group click the “Edit Group Subscriptions” button to move subscriptions between groups.

### Role

Available user roles are “Mobile User”, “Dispatch”, or “Admin”. See the “Available Features” table for details on what features each of these user roles can access.

### Compass Pro Configuration

Users can be set to any “Compass Pro Configuration” that has been previously created. See the section “Create a Compass Pro Configuration” below for details.

### Configuration Status

“Unconfirmed” will be displayed when a new or updated configuration is applied to a user. Once the user has acknowledged and accepted the configuration this display will change to “Confirmed”.

### Subscribed

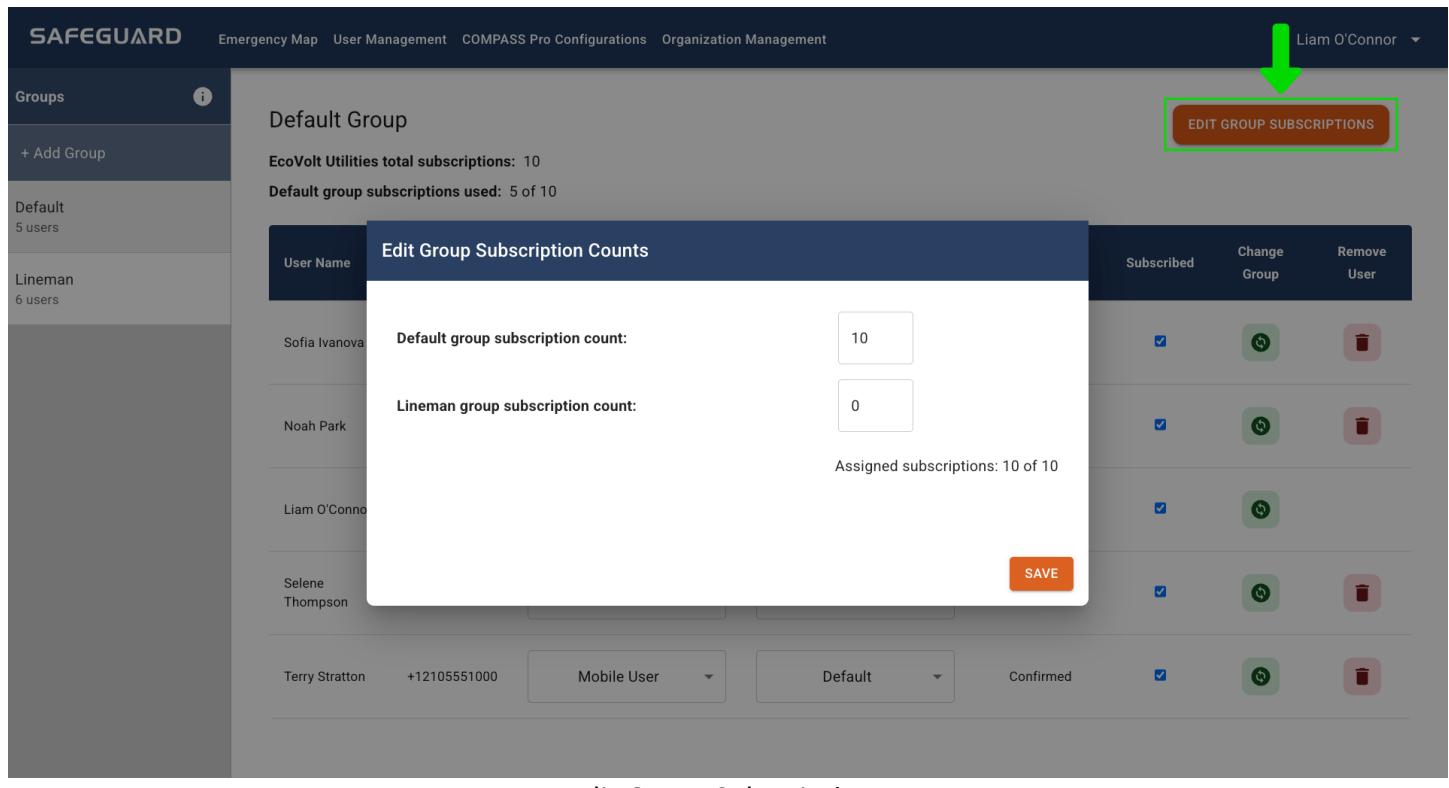

This displays the subscription seat allocation status for the user. If checked, the user has a subscription seat and can use subscription service features.

## Remove User

Remove an existing user from the organization.

## Edit Group Subscriptions

The Edit Group Subscriptions dialog enables control and allocation of subscription seats to specific user groups. The total number of subscription seats that can be allocated to all user groups combined is equal to the number of seats available to the organization.

## Compass Pro Configurations

Compass Pro Configurations can be created, edited, and applied to users as desired. A Compass Pro Configuration dictates or restricts the available settings a user can select for their Compass series device. For more information about any of the Compass Pro settings below, please see the Compass Series User Guide <https://www.safeguardequipment.com/training-materials/#user-guide>

Configuration	Voltage Sensitivity	Current Sensitivity	Impact Alerts	Fall Detection	Arc Flash	Edit	Delete
Default	User Defined	User Defined	Enabled	Disabled	Disabled		
Gas	Custom	Custom	User Defined	User Defined	User Defined		
Linemen	Custom	User Defined	User Defined	User Defined	User Defined		

### Compass Pro Configurations

#### Configuration

Name of the configuration: can be anything you choose.

Note: "Default" is the base configuration applied to users when they first sign up - it is fully configurable but cannot be deleted.

#### Voltage Range

Selection options: Low, Medium, or High.

Any voltage range with at least 1 sensitivity selected will allow the compass user to select that voltage range on the companion app. No sensitivity options selected will restrict the user's Compass series device from that respective voltage range.

#### Voltage Sensitivity/Current Sensitivity

Selection options: Values 1 – 11, Smart Adaptive, Disabled

Any selected value allows the user to select that value within the Navigator Mobile app. Unselected options restrict the user's Compass series device from those settings (see image below).

#### Impact Alerts/Fall Detection/Arc Flash

Selection options: Unlocked, Enabled, or Disabled.

Unlocked allows the user to select their own setting. The other options restrict the user's Compass series device to the specified setting.

**Edit Default** Visualizers X

**VOLTAGE SENSITIVITY**  Enabled

Select one or more sensitivity levels for each voltage range based on your requirement.

Low Range (120V - 2.4kV)

1 2 3 4 5 6 7 8 9 10 11 | SMART ADAPTIVE

**ENABLE ALL** **DISABLE ALL**

Medium Range (2.4kV - 35kV)

1 2 3 4 5 6 7 8 9 10 11 | SMART ADAPTIVE

**ENABLE ALL** **DISABLE ALL**

High Range (35kV - 500kV)

1 2 3 4 5 6 7 8 9 10 11 | SMART ADAPTIVE

**ENABLE ALL** **DISABLE ALL**

**VOLTAGE ALERTS VISUALIZER**

Distances are measured using a 4ft x 2in diameter busbar elevated 2.5 feet above ground, in an outdoor setting (26°C and 35% RH) by a tester walking with a COMPASS Pro device mounted on a fullbrim hard hat. Actual results may vary.

High 10 34.6kV Phase-Phase 20kV Phase-N... Gen 2 ⓘ

**CANCEL** **SAVE**

### Compass Configuration + Alert Visualizer

When editing a configuration, the orange highlighted (see above image) sensitivities will be available to the Compass users to select. If desired, a configuration can lock a Compass to a single setting, removing all other options for the Compass user or even disable voltage or current alert entirely.

The Alerts Visualizer tool provides a visualization of the approximate alert behavior for select voltage and current sensitivity levels under a specific test scenario. See the Compass Series User Guide for further details.

## Organization Management

The organization management page shows details about the organization, such as address, contact information, organization code, organization pin, and subscription seat count. The organization pin is a feature the organization administrator can enable for enhanced security, resulting in only those with the pin being able to join the organization.

**EcoVolt Utilities**

## Edit Organization Details

## Emergency History

The emergency history page shows a log of previous emergency events including the date of the event, the incident type, the initiator of the emergency event, and whether or not the event has been marked as resolved. Clicking on a row of an existing emergency event in the table opens a window displaying an archived chat log with the response team included in the selected emergency and any message sent during the event. A PDF copy of the event may be downloaded by selecting the download icon in the corresponding row.
